NFL Season Performance Report

All 32 Teams | Pythagorean Win Analysis | Conference Breakdown

Data: ESPN public API (live standings)

Report Date: March 08, 2026

SAMPLE REPORT — Live data from ESPN.com

1. Executive Summary

- **League Overview:** 32 teams, 272 games played, 46.0 points per game league average
- **Best Record:** Seattle Seahawks (14-3) and 2 others | **Worst:** New York Jets (3-14) and 3 others
- **Pythagorean Overperformer:** Denver Broncos (+3.0 wins vs expected)
- **Pythagorean Underperformer:** Kansas City Chiefs (-3.5 wins vs expected)
- **Conference Balance:** AFC avg 8.4 wins (383 PPG) | NFC avg 8.5 wins (399 PPG)
- **Highest Scoring:** Los Angeles Rams (518 pts) | **Best Defense:** Seattle Seahawks (292 pts allowed)

3. Complete NFL Standings with Pythagorean Analysis

Pythagorean wins use exponent 2.37 (NFL standard). Pyth Diff = Actual Wins - Expected Wins. Positive = overperforming, negative = regression candidate.

Rank	Team	Conf	Record	Win%	PF	PA	Diff	Pyth W	Pyth Diff
1	Seattle Seahawks	National Football Conference	14-3	0.824	483	292	+191	13.0	+1.0
2	New England Patriots	American Football Conference	14-3	0.824	490	320	+170	12.5	+1.5
3	Denver Broncos	American Football Conference	14-3	0.824	401	311	+90	11.0	+3.0
4	Jacksonville Jaguars	American Football Conference	13-4	0.765	474	336	+138	11.8	+1.2
5	Los Angeles Rams	National Football Conference	12-5	0.706	518	346	+172	12.3	-0.3
6	Buffalo Bills	American Football Conference	12-5	0.706	481	365	+116	11.2	+0.8
7	Houston Texans	American Football Conference	12-5	0.706	404	295	+109	11.5	+0.5
8	San Francisco 49ers	National Football Conference	12-5	0.706	437	371	+66	10.1	+1.9
9	Philadelphia Eagles	National Football Conference	11-6	0.647	379	325	+54	10.0	+1.0
10	Los Angeles Chargers	American Football Conference	11-6	0.647	368	340	+28	9.3	+1.7
11	Chicago Bears	National Football Conference	11-6	0.647	441	415	+26	9.1	+1.9
12	Pittsburgh Steelers	American Football Conference	10-7	0.588	397	387	+10	8.8	+1.2
13	Detroit Lions	National Football Conference	9-8	0.529	481	413	+68	10.0	-1.0
14	Green Bay Packers	National Football Conference	9-7-1	0.559	391	360	+31	9.3	-0.3
15	Minnesota Vikings	National Football Conference	9-8	0.529	344	333	+11	8.8	+0.2
16	Indianapolis Colts	American Football Conference	8-9	0.471	466	412	+54	9.7	-1.7
17	Baltimore Ravens	American Football Conference	8-9	0.471	424	398	+26	9.1	-1.1
18	Tampa Bay Buccaneers	National Football Conference	8-9	0.471	380	411	-31	7.7	+0.3
19	Atlanta Falcons	National Football Conference	8-9	0.471	353	401	-48	7.2	+0.8
20	Carolina Panthers	National Football Conference	8-9	0.471	311	380	-69	6.5	+1.5
21	Dallas Cowboys	National Football Conference	7-9-1	0.441	471	511	-40	7.7	-0.7
22	Miami Dolphins	American Football Conference	7-10	0.412	347	424	-77	6.5	+0.5
23	Kansas City Chiefs	American Football Conference	6-11	0.353	362	328	+34	9.5	-3.5
24	New Orleans Saints	National Football Conference	6-11	0.353	306	383	-77	6.3	-0.3
25	Cincinnati Bengals	American Football Conference	6-11	0.353	414	492	-78	6.8	-0.8
26	Washington Commanders	National Football Conference	5-12	0.294	356	451	-95	6.2	-1.2

Rank	Team	Conf	Record	Win%	PF	PA	Diff	Pyth W	Pyth Diff
27	Cleveland Browns	American Football Conference	5-12	0.294	279	379	-100	5.5	-0.5
28	New York Giants	National Football Conference	4-13	0.235	381	439	-58	7.1	-3.1
29	Arizona Cardinals	National Football Conference	3-14	0.176	355	488	-133	5.4	-2.4
30	Las Vegas Raiders	American Football Conference	3-14	0.176	241	432	-191	3.4	-0.4
31	Tennessee Titans	American Football Conference	3-14	0.176	284	478	-194	3.8	-0.8
32	New York Jets	American Football Conference	3-14	0.176	300	503	-203	3.9	-0.9

Source: ESPN public API. PF = Points For, PA = Points Against, Diff = Point Differential, Pyth W = Pythagorean Expected Wins.

4. Pythagorean Win Analysis — Regression Candidates

Teams with large Pythagorean differentials are statistically likely to regress toward their expected win total. Overperformers may decline; underperformers may improve.

Top 5 Overperformers (Regression Risk)

Team	Actual	Expected	Diff
Denver Broncos	14-3	11.0	+3.0
Chicago Bears	11-6	9.1	+1.9
San Francisco 49ers	12-5	10.1	+1.9
Los Angeles Chargers	11-6	9.3	+1.7
New England Patriots	14-3	12.5	+1.5

These teams won more games than their point differential suggests. May regress next season.

Top 5 Underperformers (Bounce-Back Candidates)

Team	Actual	Expected	Diff
Washington Commanders	5-12	6.2	-1.2
Indianapolis Colts	8-9	9.7	-1.7
Arizona Cardinals	3-14	5.4	-2.4
New York Giants	4-13	7.1	-3.1
Kansas City Chiefs	6-11	9.5	-3.5

These teams underperformed their point differential. Likely to improve next season.

5. Methodology & Data Sources

Component	Detail
Data Source	ESPN public API — site.api.espn.com (no authentication required)
Teams	All 32 NFL teams with current season standings
Pythagorean Wins	$PF^{2.37} / (PF^{2.37} + PA^{2.37}) \times \text{Games}$ — NFL standard exponent per Football Outsiders
Parity Index	$1 - (\text{max win\%} - \text{min win\%})$ — higher = more competitive league
Win% Std Dev	Standard deviation of win percentages from 0.500 — lower = more parity
Report Period	Current NFL season standings as of March 08, 2026

All data is live from ESPN and independently verifiable at espn.com/nfl/standings.

Disclaimer & Disclosure: This report uses **live standings data from the ESPN public API** at the time of generation. "Baseline Sports Analytics" is a fictional brand name used for demonstration — all underlying NFL data is real and independently verifiable at espn.com. This report does not constitute gambling advice. Pythagorean win analysis is a well-established statistical methodology used by Football Outsiders, FiveThirtyEight, and major sports analytics firms.
